**Back Cover:** 2016 Energy Science & Technology Conference

## 10 EXTRAORDINARY PRESENTATIONS FROM THE MASTERS OF THE NEW ENERGY REVOLUTION

Since 2012, connoisseurs of rare and priceless information on game-changing technologies have flown into the Spokane, Washington area from all over the world to attend the Northwest's best-kept-secret. This secret, that most locals have never heard of, is the Energy Science & Technology Conference and this is its 5th year.

What kind of people attend this conference and what are they coming to learn? Attendees include professors, government officials, inventors, hobbyists, laymen, and others who want to learn from the very people that are considered to be the pioneers of the modern-day breakthrough energy, Tesla Science & Free Energy movement.

The presenters have included world-renowned legends, geniuses, and thought leaders such as John Bedini, Peter Lindemann, Eric Dollard, Jim Murray, Paul Babcock, and others.

Some of the presentations include *Four Quadrant Representation of Electricity* by Eric Dollard (the only man alive to have replicated Tesla's wireless ground transmission technology), *Open System Thermodynamics* by Peter Lindemann (an internationally recognized authority of the Tesla & Free Energy Sciences), *Crystal Batteries* by John Bedini (a name that is synonymous with the top quality audio amplifiers and exotic electromagnetic energy

technologies), and dozens and dozens of others.

The entire catalog is on the homepage of A & P Electronic Media at <http://emediapress.com>.

This is a 3-day event that goes from Friday to Sunday, July 8, 9 & 10 at the Hayden Eagle's Lodge in Hayden, Idaho.

One of the most popular presentations was a demonstration of lighting 50 watts of light bulbs to full brightness with a net draw from the power supply of only 1 watt. This has nothing to do with wild and crazy "perpetual motion" claims.

That's what's unique about the **Energy Science & Technology Conference** - You actually see demonstrations of these kind of machines.

# A & P ELECTRONIC MEDIA SAMPLE CATALOG

FULL CATALOG AT - <http://emediapress.com>

<http://thequantumkey.com>

**The Quantum Key** by Aaron Murakami is a simplified Unified Field Theory for the layman that overturns Einsteinian physics. This is accomplished with elementary school math and junior high school equations. A simple model reveals what time, space and gravity really are in a way that any junior high school student can understand. This allows one to see that not only can there be systems that produce more energy output

than input, but that they already exist. Many examples are included.

<http://ignitionsecrets.com>

**Ignition Secrets** by Aaron Murakami gives a step by step walk-thru on various ignition methods including his patented Plasma Ignition. It burns water on contact by instantly dissociating hydrogen from the moisture in the air and from the hydrocarbon fuel itself, extends the lead burn limits, drops pollution to near undetectable levels and even lowers the operating temperature. Aaron even created a high speed pulsed electromagnetic motor that operates from this same circuit.

<http://waterfuelsecrets.com>

**Water Fuel Secrets** by Aaron Murakami is a perfect companion to **Ignition Secrets**. The book and video presentation is considered by many to be the most important document in the world on water fuel science. It shows that it is an effort in futility to try to run an engine purely on HHO (electrolyzed water gas) and further explains that it is necessary to mix ionized nitrogen from the air with the HHO in order to prevent the formation of the water molecule after combustion. That is how you get the thermal energy out of the water.

**Open System Thermodynamics** by Peter Lindemann teaches about a branch of physics that describes how any system that is open to free environmental input can do more work than the operator of a system has to provide. The bottom line is that an open system can freely output more energy than we have to pay for on the input. Many physicists and engineers are unaware that Thermodynamics was corrected almost 40 years ago to show that this is completely possible and does not violate any laws of physics.

<http://opensystemthermodynamics.com>

**Battery Secrets** and **Battery Rejuvenation** by Peter Lindemann are landmark presentations that have set the standard for battery charging and rejuvenation technologies. Armed with this knowledge, many people around the world have set up battery rejuvenating businesses, which are very profitable but also green. What the student learns is that a lead acid battery is essentially a water fuel cell that makes or breaks a water molecule depending on whether the battery is being discharged or charged. With nothing more than water and electricity, 80%

of lead acid batteries that are doomed for the dump can be rejuvenated back to 80% to 110% of brand new. That's right - some used batteries have been brought back to a capacity that is higher than a brand new equivalent right off the shelf. This knowledge is intended to be used with the world famous Tesla Charger battery charger and rejuvenator line at <http://teslachargers.com>, which was founded by Aaron Murakami and Peter Lindemann of A & P Electronic Media. Both presentations are available at <http://batterysecrets.com>

## MEET THE FOUNDERS OF A & P ELECTRONIC MEDIA

**Aaron Murakami**, BSNH is committed to the development and distribution of highly disruptive knowledge. He is a former owner of Top o' the Line Total Health Shoppe in Spokane and has spearheaded many ventures. He is a consultant to several technology groups. Aaron is a co-founder of Energetic Forum & Energy Science Forum that boasts a membership of over 130,000. His books include *The Quantum Key* & *A Course in Mind Power*. He is the inventor and patent holder of the world's most efficient plasma ignition system that actually ignites water in an engine.

**Peter Lindemann**, D.Sc. is a Science Historian, an inventor, author, lecturer, and researcher. He is the author of *The Free Energy Secrets of Cold Electricity*, the *Electric Motor Secrets* films, *Battery Secrets*, and co-author of the *Bedini SG Handbook* series. Peter worked with John Bedini during much of the early development of the advanced battery charging technology, starting in 2004. Peter is a world renowned expert on Tesla technologies and was a board member for the legendary Borderland Sciences Research Foundation. Peter has retired from day to day operations, but remains fully engaged in the mission of getting this information out!

**The Bedini SG** series by Peter Lindemann and Aaron Murakami is a set of plans that allows you to build a model of John Bedini's patented machine that runs from one battery, turns a wheel, charges a second battery and lights some lights. Many models of the device have run "indefinitely" while producing useful outputs. If you build a bigger one, it will do more. But with any new activity, it is always best to start at the beginning. The Bedini SG is miniaturized Tesla technology and many thousands of

people around the world have built one but few have achieved the results that John Bedini has documented. What is so amazing about this machine is that although the output battery can capture over 90% of what left the input, if you measure the mechanical work done in the wheel, that accounts for almost 30%, which means there is about 1.2 times more work in total being done than what was provided by the input battery. This is accomplished by sticking to the parameters of open system thermodynamics which allows this to happen. <http://bedinisg.com>

**Magnetic Energy Secrets Part 1 & 2** by Paul Babcock will show you that the 170 year old claims that magnets are not a source of energy is completely false. One of the most important concepts to understand is that the strength of the magnetic field is absolutely not proportionate to the amount of electricity used to produce it. This rubs the conventional scientists the wrong way but you will see indisputable proof and will learn of a simple experiment you can do on your own, which has the skeptics running for cover. Paul Babcock is a bril-

liant engineer who has studied Tesla and other innovators over the years. He has been able to apply what he knows to build transformer technologies that are cool to the touch, which is supposed to be impossible. You will enjoy Paul's down to Earth way of explaining difficult concepts in very simple ways. You will also enjoy learning about his experience of getting kicked out of a well-known university for trying to show these experiments that make a mockery of textbook science. <http://magneticenergysecrets.com>

**Electric Motor Secrets Parts 1 & 2** by Peter Lindemann shows several principles that can be applied to off the shelf motors to increase their efficiency. Imagine having a motor speed up by increasing the work you try to get on the output. This video series is the foundation to *Advanced Motor Secrets* by David Squires. Anyone serious about learning practical modifications that give dramatic results in motor technology needs this series.

<http://advancedmotorsecrets.com>

**Advanced Motor Secrets** by David Squires, E.E. is the most complete tutorial ever released to the public on how to design "super-efficient" electric motors. All aspects are covered, from the theory, to the math, to the design methodologies, to the physical model. If you have ever wondered whether real electric motors that give you more on the output than you supply on the input actually exist, this presentation will rock your world!

<http://electricmotorsecrets.com>

## WHAT MAKES A & P ELECTRONIC MEDIA DIFFERENT?

Many publishers are getting on the green energy bandwagon and some of them even become best sellers in the digital marketplace. But here is one question to ask yourself.... When are they going to talk about something other than carbon emissions, climate change or the same copy and pasted repackaged information that everyone else is printing? What about real solutions that catapult us past the typical paradigm by proposing solutions and science that transforms the very way we view energy and its sources?

A & P is different because it has aligned itself with the most highly-acclaimed, world-renowned leaders in the exotic energy category. There are over 130,000 members

that have joined Energetic Forum and Energy Science Forum and we have over 92,000 subscribers. Our catalog boasts about 80 different books, videos and combo packages that are A & P Electronic Media's exclusives. This library absolutely delivers the knowledge necessary to trigger an advancement in the energy paradigm.

Every year, the Energy Science & Technology Conference produces nearly a dozen presentations that help build the A & P Electronic Media catalog.

The fact that these distinguished members of the global energy community are willing to have A & P Electronic Media publish their work, then that in itself is evidence

that you are in the right place at the right time and have finally found a publishing company that you can call home.

Opportunities are never lost, they just go to someone else. Please spread the word by sharing this paper with your friends, family, co-workers or anyone else that may appreciate knowing the truth about abundance physics, open systems and the fact that you can indeed have a system that produces more work than you pay for.

If you are looking for a financial opportunity by helping to spread the word about this work, consider joining the A & P Electronic Media Affiliate Program:

<http://emediapress.com/affiliate-program/affiliate-program-signup/>

## FREE TESLA RELATED ENERGY SCIENCE PRESENTATIONS ON CONNECTED TELEVISION

**TESLA MEDIA NETWORK™** on ROKU  
(You must login to your account first before clicking on the below for it to work.)

<https://my.roku.com/account/add?channel=teslatv>

**TESLA MEDIA NETWORK™** on the Opera Network Includes TiVo, Samsung and Sony Blu Ray players, LG smart TVs, Sony and Sony Bravia smart TVs, RCN cable network, and all devices with Opera software. Also several European platforms like SwissCom.

(Coming soon on these networks so keep searching!)

<http://TeslaMediaNetwork.com>

In further support of the publications produced by A&P Electronic Media, I have produced my website, titled **FREE ENERGY**. This site is to introduce you to the information in this field that has already been released into the Public Domain. So, if the products in this Newspaper seem interesting to you, but you'd like to learn a little more before purchasing any of them, then spending a little time on my website might be just what you need.

This site teaches the scientific principles of how **FREE ENERGY** is made possible. After all, free energy is just another way of saying "energy available from Nature." So, if you are looking for plans for a "home power plant" for \$200, I'm sorry to tell you, but no such plans exists, or are ever likely to exist!

If you want a quick over-view of what really is possible, just go to my Home Page at:

<http://free-energy.ws>

From that page, you can navigate to anywhere else on the site. Take a look at our Energy Philosophy page, or our section on Conservation or Heat Pumps, available from the Technology pull-down Menu.

I think you will quickly see that our approach is practical, that our science is sound, and our solutions are available right now! All of the information on the website is free, with ample links back to the extraordinary library of cutting-edge products produced by A&P.

Thanks for getting involved in the **REAL** energy revolution!

Peter Lindemann, D.Sc.

<http://teslasradiantenergy.com>

**Tesla's Radiant Energy** by Peter Lindemann is a powerful presentation that shows you the truth about Tesla's Radiant Energy systems, which have been a mystery for over 100 years. Many Tesla "experts" are more than willing to give you a fancy high voltage spark show, but in reality, there are only a handful of people around the world that actually have it right. When you understand what

Tesla understood, you will see that he envisioned an entirely different form of electricity than the one we have today.

<http://teslashiddendiscoveries.com>

**Tesla's Hidden Discoveries** by Jim Murray will be one of the most unique and entertaining presentations on the topic of Tesla that you have ever seen. It is both humorous and informative while Jim takes you on his path to what led him into his work today, which includes developing some of the most efficient drag free generators in the world. Jim Murray is also one of the world's leading experts on mechanical resonance amplifiers, which Tesla was involved in. Amazingly, there is little available on this profound topic except for Jim's teachings.

**Four Quadrant Representation of Electricity** by Eric Dollard is a presentation that has been simplified for most layman when it comes to his very famous Four Quadrant Theory. Back when Tesla was around, General Electric hired Charles Proteus Steinmetz to figure out what Tesla really had and to develop the math that makes it engineerable. Eric Dollard is today's Steinmetz and Tesla combined.

<http://fourquadranttheory.com>

**PAPERBACK ON AMAZON:** <http://feelthevibe.com/amazon/1518815936>

**Lone Pine Writings** by Eric Dollard is based on a series of papers, which he wrote while in Lone Pine, California. Learn why electrical engineering "turned left" and abandoned its mathematical underpinnings. Find out "what electricity really is" and how it was correctly engineered at the dawn of the Electrical Era! Eric Dollard is the undisputed Tesla master of the world and is thought to understand the nature of electricity beyond any other person alive. <http://lonepinewritings.com>

**Wireless Giant of the Pacific** by Eric Dollard presents the historical & technical details that gave rise to the great transmission facility installed at Bolinas, California. What makes the original transmission technology so special is that it was instantaneous, which means there literally is no velocity. This is done by longitudinal electrostatic propagation instead of transverse electromagnetic waves.

This is yet another one of many examples of how and why Einstein is wrong. Three other documents are included.

<http://wirelessgiantofthepacific.com>

**The Real History of the Ed Gray Motor** by Mark McKay is the definitive history on this legendary motor that put out many times more power than it took to run. It appears to have been inspired by Nikola Tesla's technology. This is not a how-to book but rather a historical record of facts that Mark was able to gather by flying all over the country talking to Ed Gray's family members, investors, engineers, etc. There are two parts to this series and both are available as a package.

Ignition Secrets by Aaron Murakami is recommended since the plasma ignition circuit is an analogy of the Gray Tube circuit.

<http://evgrayrevealed.com>

**Classic Energy Videos** is a collection of many hours of films on "free energy" technologies including some old Borderlands classics by Peter Lindemann and Eric Dollard. Most of these videos are over 20 years old, and were produced before the "modern communication age". Never the less, they set the stage for the modern Free Energy movement that is gaining ground every day. Back then, we didn't know that the First Law of Thermodynamics was WRONG.

<http://classicenergyvideos.com>

**Solar Secrets** by Peter Lindemann is a **FREE DOWNLOAD**. This book exposes the solar industry's misinformation regarding solar panel efficiency. It also shows you exactly how to build equalization into the battery bank to greatly extend the life of the batteries. Additionally, it shows how to actually charge lead acid batteries properly so that the chemistry is reversed back to like-new on a full charge cycle. Armed with this information, you will be light years ahead of the typical consumer who may be interested in putting a solar energy system on their home.

<http://freesolarsecrets.com>

**Home Energy Savings Guide** by Peter Lindemann & Aaron Murakami reveals many cost saving technologies and strategies that other books in the same category simply do not discuss. With their background and experience in energy technologies, you're getting an authoritative guide that has set the standard since 2009. Learn the real insulative rule of thumb, cutting edge off the shelf

products, heat pump hot water heaters that we predicted years ago and more!

<http://homeenergysavingsguide.com>

**How to Build a Jet Engine** by Aaron Murakami is a comprehensive package showing exactly how to build a very highly efficient turbojet engine that is more efficient, and runs cooler and slower than comparable jet engines. This shows one of the test engines for Aaron's plasma ignition system. For the design, the flame tube inside was designed by his friend Michael John Nunnerley who is the patent

holder for the world's most efficient heat exchanger. This is sure to be a hit with the DIY hobbyist.

<http://howtobuildajetengine.com>

**Lessons in Advanced Perception** by Harold Schroepel was the primary training curriculum at The Institute for Advanced Perception in Oak Park, Illinois, starting in 1960. The training grew out of over 10 years of experimental work. During this time in the 1950's, hundreds of mind development techniques were researched and tested for their effectiveness. Many ancient techniques from Yoga, Martial Arts, and other Eastern teachings were tested on thousands of volunteers. These are the ones that worked!

<http://lessonsinadvancedperception.com>

**A Course in Mind Power** by Aaron Murakami is one of the most unique mind power books in the Western world. Aaron shares exercises based on his experience of what works and not just because they're supposed to work. Aaron is the one and only protégé of Rodger Estes who was the first non-Chinese Qigong master certified at the qigong delegation in Beijing. Aaron is a natural psychic but is also a trained Technical Remote Viewer. Combine this with his technical background in the aetheric energy sciences and you will be many steps ahead when you read this book.

<http://acourseinmindpower.com>

# OPEN SYSTEM THERMODYNAMICS

It has always been a myth that a system cannot produce more work than we have to put into it. Skeptics claim this violates the laws of physics and this is a phony perpetual motion claim. Little do they know that in 1977, a Nobel Prize was given to a chemist and thermodynamicist named Ilya Prigogine for his work on Open Dissipative Systems. It was said that this extended the field of thermodynamics, but in reality, it corrected it.

As long as a system is open to free environmental, external input, it can produce more work than we have to pay for at the input. Every refrigerator already does this as the total heat moved can be hundreds of percent more than the electrical equivalent that we pay for in electricity to run the compressor. However, as soon as the same principle

is applied in electrical or mechanical circuits, it suddenly becomes a big taboo.

The principle is very simple - if a child inputs 1 unit of energy to fly a kite for a certain period of time and the wind inputs 9 units of work, that is 10 units of work going into this system. If half of all this input is wasted in bad kite design, friction, etc. this kite flying system is only 50% efficient and is nothing to brag about. However, 5 parts of flying work were accomplished, which is 500% more than the child had to input so the child did indeed get a 5 times net gain in work accomplished compared to what he input. This is a completely valid and legitimate free energy system that is open to environmental input.

This is the principle at work in many legitimate free energy machines such as the

Bedini SG, Veljko 2 Stage Oscillator, Paul Babcock's electric motor and others - and of course, this principle does not violate any laws of physics. In fact, the 2nd Law of Thermodynamics doesn't even apply to anything in the entire universe because there is no such thing as a closed system.

Get a copy of The Quantum Key by Aaron Murakami and Open System Thermodynamics by Peter Lindemann. Between these two, you will have an understanding of the real thermodynamic principles that describe the natural universe, which have been left out of the textbooks for the last 40 years. <http://thequantumkey.com> & <http://opensystemthermodynamics.com>

Michael Waters will be continuing this conversation at the upcoming conference.

## THE WORLD'S MOST ADVANCED BATTERY CHARGING SYSTEMS

**Tesla Chargers prevented thousands of tons of batteries from winding up in the scrap yard.**

**Tesla Chargers SUCCEED where other chargers fail!**

<http://teslachargers.com>

## BATTERY REJUVENATION

Lead acid batteries have a bad reputation but in fact, they are a near perfect battery. It is not the battery technology that is the problem, it is that no battery charger company has ever made a charger available that can properly charge them - that is until John Bedini set a new standard and changed the game.

After a couple million dollars in research and development and many years later, Tesla Chargers, based out of Spokane, Washington, still remains the world's leading distributor for these game changing battery charger-rejuvenators and solar charge controllers, which give a theoretical infinite life span to lead acid batteries.

The primary reason that lead acid battery life plummets is that all other battery charging technologies on the market chronically undercharge the batteries. The battery industry wants you

to believe that by pushing the batteries to 13.8 to 14.8 volts and letting the battery settle above 12.6 means it is fully charged, but nothing could be further from the truth.

The graph below is from a book that is nearly 100 years old that taught farmers how to keep their batteries indefinitely good. The secret is to push the batteries over 15 volts until it peaks and the voltage then drops. If that doesn't happen, the battery chemistry has not reversed - lead acid battery chemistry is indeed 100% reversible.

The voltage drop means that the internal impedance of the battery drops and this is evidence that the final layers of sulfation have dissolved back into the electrolyte - this is the "topping event" that brings the battery to like-new condition after each charge cycle.

# 2016 ENERGY SCIENCE & TECHNOLOGY CONFERENCE

SCHEDULE OF EVENTS - <http://energyscienceconference.com/2016-schedule/>

## FRIDAY

ON YOUR OWN BREAKFAST

700am~630pm REGISTRATION CHECK IN (all day)

830am~845am AARON MURAKAMI – WELCOME & INTRODUCTION TO THE CONFERENCE (15 min)

845am~915am KEN ROCHON – SHARING THE BREAKTHROUGH ENERGY MESSAGE (30 min) This is part of the Conference welcome and orientation.

920am~1050am – MORAY B. KING – FROM NANOBUBBLES TO BALL LIGHTNING: AN OVERVIEW OF NEW ENERGY POSSIBILITIES (90 min)

1050am~1100pm BREAK (10 min)

1100am~1230pm –PROFESSOR ROBERT M. HARALICK – PARAMAGNETIC AND DIAMAGNETIC FIELD EXPERIMENTS, ROBERT M. HARALICK, GUY OBOLENSKY, LOREN ZANIER (90 min)

1230pm~215pm NETWORKING/SOCIALIZING & PAID LUNCH OR ON YOUR OWN LUNCH (105 min)

215pm~615pm ERIC DOLLARD – ELECTRICAL TRANSMISSION IN MULTIPLE COORDINATE SYSTEMS (240 min) THERE WILL BE A 10 MINUTE BREAK AT 345PM IN THE MIDDLE OF THIS PRESENTATION.

615pm~630pm BREAK (15 min)

630pm~800pm POSSIBLE EXTRA PRESENTATION (90 min) TO BE ANNOUNCED

800pm~1100pm NETWORKING/SOCIALIZING/VENDOR ROOM & PAID DINNER OR ON YOUR OWN DINNERTIME

## SATURDAY

ON YOUR OWN BREAKFAST

800am~600pm REGISTRATION CHECK IN (all day)

855am~900am ANNOUNCEMENTS (5 min)

900am~1030am AARON MURAKAMI – PULSED PLASMA MOTOR – KEY TO THE

GRAY MOTOR? (90 min)

1030am~1040am BREAK (10 min)

1040am~1210pm JOHN BEDINI – SURPRISE PRESENTATION (90 min)

1210pm~200pm NETWORKING/SOCIALIZING & PAID LUNCH OR ON YOUR OWN LUNCH (110 min)

200pm~330pm GRAHAM GUNDERSON – MAGNETIC IMPLOSION TRANSFORMER (90 min)

330pm~340pm BREAK (10 min)

340pm~510pm PAUL BABCOCK – TO BE ANNOUNCED (90 min)

510pm~520pm BREAK (10 min)

520pm~650pm JIM MURRAY – FUNDAMENTALS OF THE TRANSFORMING GENERATOR (90 min)

650pm~700pm BREAK (10 min)

700pm~830pm POSSIBLE EXTRA PRESENTATION (90 min) TO BE ANNOUNCED

830pm~1100pm NETWORKING/SOCIALIZING/VENDOR ROOM & PAID DINNER OR ON YOUR OWN DINNERTIME

## SUNDAY

ON YOUR OWN BREAKFAST

900am~1030am MICHAEL WATERS – OPEN SYSTEM PHYSICS AND THERMODYNAMICS (90min)

1030am~1040am BREAK (10 min)

1040am~1210pm SPECIAL PRESENTER – SURPRISE PRESENTATION (90 min)

1210pm~200pm NETWORKING/SOCIALIZING TIME & ON YOUR OWN LUNCH (110 min)

200pm~400pm PANEL DISCUSSION – COULD RUN LONGER (120 min)

400pm~7pm NETWORKING/SOCIALIZING & ON YOUR OWN DINNERTIME – END OF CONFERENCE

## WIND POWER GONE MAD?

The wind power industry is simply out of its mind and the way wind generators are designed is clear evidence that mass hypnosis works!

If you haven't noticed how ludicrous this is - you have a giant 3-blade propeller where the fan blades makes up about 3% of the area that it covers while turning. That means that the wind is able to blow through 97% of the empty space doing absolutely nothing.

On top of this, the blades are designed with the same aerodynamics used to design aircraft. That means the blades slip through the wind with minimum resistance.

The wind industry should be utilizing a design that actually lets the wind create AS MUCH DRAG AS POSSIBLE on the turbine so that a minimum amount of wind will impart the maximum amount of push.

Otherwise, the conventional designs are actually accomplishing nothing more than utilizing a maximum amount of wind to generate a minimum amount of electricity and that literally is complete insanity. And, our tax dollars

are subsidizing this nonsense? Tesla said it best, "*The scientists of today think deeply instead of clearly. One must be sane to think clearly, but one can think deeply and be quite insane.*"

Michael

Waters has an extensive background in aerodynamics and is now changing the game. This is a picture of a wind turbine where 100% of the surface area is available to be pushed on by the wind, the wind will divert outwards to some slots in the side that are biased in one direction and this method allows one to generate electricity in winds LESS THAN 1 MPH!

# Energy Science & Technology Conference 2016

## 10 NEW PRESENTATIONS & 1 PANEL DISCUSSION!

Another \* EXCLUSIVE \* One-Of-A-Kind Energy Conference

When: Friday July 8th, Saturday July 9th & Sunday July 10th, 2016

Where: Eagles Lodge, 1520 W Wyoming Ave, Hayden, ID, 83835

<http://energyscienceconference.com>

THESE ARE SOME OF THE PRESENTERS YOU WILL BE LEARNING FROM!

PAUL BABCOCK

AARON MURAKAMI

JOHN BEDINI

ERIC DOLLARD

GRAHAM GUNDERSON

JIM MURRAY

## ***PRESENTATIONS INCLUDE***

**John Bedini** - *Surprise Presentation*

**Graham Gunderson** - *Magnetic Implosion Transformer*

**Eric Dollard** - *Electrical Transmission in Multiple Coordinate Systems*

**Aaron Murakami** - *Pulsed Plasma Motor*

There's a whole lot more!

Although there are many wonderful energy conferences around the world, this conference is the only one where you actually see the "impossible". For example, at the 2013 Conference, John Bedini showed one of his famous SSG Energizers running in a special mode where it ran on a battery and charged a battery with all the recovered energy - then, the input battery charged back up by itself in front of the entire audience.

Many make these claims, but this is the conference where it actually happens. Contrary to popular belief, this kind of technology actually does not violate any laws of physics. The entire field of thermodynamics has been extended since 1977 to include these kinds of systems when Ilya Prigogine won the Nobel Prize for "Open Dissipative Systems." It changed the world but hardly anyone noticed. This is also the only conference where

you will get to meet Eric Dollard - the only man alive who has replicated many of the longitudinal technologies developed by Nikola Tesla. Some people like to give you high voltage spark shows to impress you about Tesla's work but here is where you learn what Tesla was really working on and it isn't about a light show. See who else is speaking at the 2016 Energy Science & Technology Conference.

<http://energyscienceconference.com>

**Aaron Murakami**
